Using Technology to Improve Women’s Health Care

Ochsner Obstetrics and Gynecology Simulation Program: A Review of the Literature and Description of a Multidisciplinary Simulation Program Targeting Management of Obstetric Emergencies

Botulinum Toxin A: A Review of Potential Uses in Treatment of Female Urogenital and Pelvic Floor Disorders

Current Approaches to Risk Assessment and Prevention of Preterm Birth—a Continuing Public Health Crisis
Innovating Women’s Healthcare

For the past three years, Ochsner has ranked among the top 5 percent in the nation for women’s health by Healthgrades®. We’re also proud to be recognized by U.S. News and World Report as “High Performing” in gynecology. Discover how Women’s Services at Ochsner is using technology to provide women across the region with the highest quality of care.

Connected Maternity Online Monitoring (Connected MOM) is offered free of charge to pregnant patients who qualify as a way to help manage their pregnancy with fewer visits to the obstetrician. Through Connected MOM, expectant mothers are able to digitally send weight and blood pressure readings to their medical team from the comfort of home without needing to schedule an appointment.

TeleStork

Ochsner’s TeleStork program provides unmatched specialized care to ensure healthy outcomes for pregnant patients. With one of the only 24/7 maternal fetal specialists in the region, our physicians are dedicated to improving all aspects of perinatal care. The TeleStork program creates an additional layer of support to patients in labor with the use of industry best practices and advanced technology.
