### CME QUESTIONS VOLUME 7, NO.2

This section provides a review. Mark each statement (circle the correct answer) according to the factual material contained in this issue and the opinions of the authors. A score of 70% is required to qualify for CME credit.

#### Effective Glycemic Management in Hospitalized Patients (pp. 52-57)

- All but which of the following are mechanisms of harm associated with hyperglycemia in critically ill patients?
  - Impairment of immune function
  - Decreased coagulopathy
  - Increased inflammation
  - Endothelial dysfunction
- The detrimental effects of hyperglycemia in critically ill patients are seen in patients both with and without a previous diagnosis of diabetes:  
*True or False*
- There are too many barriers associated with tight blood sugar control to make it a feasible goal for critically ill patients: *True or False*

#### Inhibition of Erythroleukemia Cell Growth by Triplex-forming RNAs (pp. 58-60)

- Triplex binding is a type of DNA binding which involves the addition of a third DNA strand to a DNA duplex: *True or False*
- Triplex binding is dictated by Watson-Crick base pairing: *True or False*
- If properly designed, retroviral vectors can induce triplex binding:  
*True or False*

#### Chicken Sarcoma to Human Cancers (pp. 61-64)

- Chronic lymphocytic leukemia is characterized by the Philadelphia (Ph) translocation: *True or False*
- v-src is a constitutively active transforming protein because of the mutation in its C-terminal region: *True or False*
- The following kinases are members of the Src family except:
  - Lck
  - Syk
  - Lyn
  - Yes
  - Blk

#### Osler's Pupil, Henry W. Ochsner, MD (pp. 65-73)

- How was Osler's pupil, Henry W. Ochsner, related to Albert J. Ochsner, Alton Ochsner's mentor?
  - They were brothers
  - Albert was Henry's uncle
  - They were first cousins
  - They were not related
- Sir William Osler believed Henry W. Ochsner contracted typhoid by which of the following means?
  - Exposure to a patient with typhoid
  - Consumption of contaminated water
  - Inadequate sewerage near Ochsner's home
  - Mosquito bite
- How long, on average, do people who ingest Salmonella enterica serotype Typhi remain symptom-free?
  - 6 hours
  - 1-3 days
  - 7-14 days
  - 21-60 days

#### Research at Ochsner Clinic (pp. 74-76)

- Alton Ochsner Medical Foundation was chartered on January 15, 1994:  
*True or False*
- The first director of the Ochsner Medical Foundation was Dean Echols:  
*True or False*
- Dr Schales' field of investigation was biochemical properties of renin:  
*True or False*

### EVALUATION

Your response to these questions helps us to enhance our CME offerings. Please take the time to respond and return the evaluation. Thank you.

Please use the following codes to answer items 1-7.

**SA** – Strongly Agree  
**A** – Agree  
**U** – Undecided  
**D** – Disagree  
**SD** – Strongly Disagree

- The objectives of the CME activity were clearly stated.  
**SA A U D SD**
- The content of the journal articles was up-to-date.  
**SA A U D SD**
- The journal articles illustrated independence, objectivity, balance, and scientific rigor.  
**SA A U D SD**
- The content was closely related to objectives of my clinical practice and/or teaching.  
**SA A U D SD**
- The journal articles increased my knowledge of the subject.  
**SA A U D SD**
- The content of the journal articles met my personal expectation and needs.  
**SA A U D SD**
- I will apply the information learned from these journal articles in my clinical practice.  
**SA A U D SD**

Do you have any suggestions as to how to improve the content of the journal articles?
